### Profile

I'm a third-year Information Systems Engineering student focused on analytics, data science, and distributed systems. I enjoy working with data to extract insights, solve real-world problems, and deliver value through data-driven thinking.

I have experience with SQL, Python (Pandas, NumPy), Excel, Power BI, and Tableau. My projects involve data cleaning, transformation, and visualization. I've also worked with cloud platforms like Azure and AWS.

Currently, I'm exploring distributed systems and AI/ML to build scalable and intelligent solutions. I'm open to internship opportunities where I can contribute, grow, and apply my skills in practical, impactful settings.

### Education

**B.Sc. in Information Systems Engineering**  
Mehmet Akif Ersoy University

2022 – 2026

### Skills & Tools

- SQL
- Excel
- Tableau
- Git
- Data Cleaning
- Data Storytelling
- Python (Pandas, NumPy)
- Power BI
- Docker
- Azure / AWS
- Data Visualization
- Distributed Systems

### Languages

- English (Fluent)
- Turkish (Native)
